

CLEAN WAVE—MOMENT 1

Hand Hygiene—4 Moments Campaign

Before initial patient or patient environment contact.

For example:

- Before taking a blood pressure, temperature or pulse. Before touching a wheelchair or walker.
- In a single room this is everything in the residents room.
- In a multi-bed room this is the area inside the resident's curtain (touch the curtain and then the resident = missed hand hygiene opportunity).
- In an ambulatory setting, the resident environment is the area that may come into contact with the resident within their cubicle.
